

Lest we Forget so we don't forget

This text has become the motto for Edwin van der Wolf. In his very big enthusiasm and interest in the history of the liberation of Holland in general and of the Canadian liberators in special.

Edwin is a prominent member of the Information Centre Canadian Cemetery Holten East Holland. He is besides a desk clerk to receive visitors, guide with the many guided tours at the field of honour. Just more specified is his role in the research commission there they make many soldier profiles with help of the downloaded service files and if available information of the Canadian families of all the fallen soldiers. These stories are presented in the content of the database and is to be seen for every visitors at a touch screen in the Information Centre. An important part is to follow the advance of the Canadian Army during the liberation of East and North Holland so that there is a good cohesion with these stories.

Edwin is of big value for us with his big knowledge as our historical conscience of the role of the Canadian soldiers during the battles and liberation of different towns and villages.

He proves with his project about the Canadian Scottish Regiment a big service to the history of the liberation of North West Europe and gives the interested people the possibility to look after all these stories and the big sacrifices and losses of this regiment.

On behalf of the board of the Information Centre Canadian Cemetery Holte I wish him much success.

Albert Boode

Chairman
